

## **EARTH DAY**

Earth Day is an annual event celebrated on April 22. This year we celebrated Earth day in our school on 20<sup>th</sup> April 2018. A special assembly was conducted where the children were enlightened on the topic. Various events were held to demonstrate support for environmental protection. Each day is a day of responsibility to our planet, responsibility to the people who inhabit it, to the nature itself, of which we are a part. The Earth is a unique planet in the universe it should be the responsibility of every human being to take care of its environment. If the inhabitants of planet earth want their common house to be blooming garden, then they should make efforts to protect it. The ecology of the Earth suffers stronger and stronger every day. The volume of waste is steadily growing, they are not processed, but are reported to landfills. Extinct animals die due to deforestation, many aquatic mammals and fish have long been threatened with extinction due to pollution of water bodies.

To conclude, education and action are the two most valuable steps we can take to protect our planet. Earth Day is the day to start.
